10 Января 2017

Брюссель, 10 Января 2017: Европейская ассоциация аэропортов ACI EUROPE, публикует свой отчёт о грузообороте за **Ноябрь 2016 года**. Этот отчёт только о воздушном транспорте, который включает в себя все виды пассажирских рейсов авиакомпании из и в Европу, стоимость предоставляемых услуг, расписание рейсов и т.д.

Пассажиропоток, проходящий через европейскую сеть аэропортов, получил сильный толчок в Ноябре, в среднем увеличившись на **+7.1%**. Данная динамика начала появляться с сентября прошлого года, изначально опираясь только на европейский рынок, но сейчас она усиливается и за счёт рынков находящихся вне Европы.

Аэропорты, находящиеся в Европейском союзе сообщили о среднем увеличении пассажиропотока на **+8.0%**. В то время как в Болгарии, Хорватии, Кипре, Чехии, Венгрии, Литве, Люксембурге, Мальте, Нидерландах, Польше, Португалии и Румынии наблюдается удвоенный рост. Несколько столичных аэропортов в этих странах достигли невероятного роста, в том числе София (+48.9%), Варшава (+31.5%), Бухарест (+21.1%), Ларнака (+26.1%), Мальта (+23.1%) и Лиссабон (+21.1%).

Между тем, в областях не входящих в ЕС можно заметить увеличение пассажирооборота на **+3.9%**, что подтверждает его восстановление на фоне более устойчивого роста в России, а также по-прежнему отрицательная, но повышающаяся производительность в Турции. Исландия и Израиль также внесли значительный вклад в эти положительные результаты. Лучшую производительность в неевропейских регионах показывают данные аэропорты: Кеблавик (+57.8%), Одесса (+29.6%), Ростов (+33.6%), Тель-Авив (+20.6%), Новосибирск (+20.5%), Екатеринбург (+20.3%) и Москва-Шереметьево (+14.7%).

В соответствии с предыдущими месяцами, увеличение роста пассажиропотока было вызвано дополнительными центральными и региональными аэропортами, что отражает продолжающееся развитие низкобюджетных моделей авиалиний и создание новых разносторонних воздушных путей.

Среди топ-5 европейских хабов, Амстердам-Схипхол продолжает демонстрировать лучший пассажирооборот (+8.7%), в то время как Франкфурт и Париж-Шарль де Голль улучшили свои показатели по сравнению с предыдущими месяцами (+4,9% и +4,5% соответственно) наряду с лондонским Хитроу, чей рост ограничен в силу ограниченности возможностей (+2.5%). Стамбул-Ататюрк продолжает страдать от снижения трафика из-за политической ситуации и террористической угрозы в Турции (-5.7%).

Как сообщается, **грузовые перевозки** по всей европейской сети аэропортов продолжают тенденцию сильного роста **+6.5%**, данная динамика по большей части обусловлена аэропортами внеевропейского региона - в отличие от пассажирских перевозок.

Движение воздушных судов выросло на **+3.7%** по всей Европе, что отражает значительное расширение возможностей авиакомпании.
